

Painting the SLS Landscape Satellite Speakers

Using a 400 grit sand paper, lightly sand all surfaces of the SLS SAT speaker.

Wipe down or blow off any dust.

Mask off the grille making sure no paint enters behind grille onto drivers.

We suggest using outdoor paint designed for plastic. Valspar® and Rust-Oleum® are two brands that manufacture quality outdoor spray paint.

If you require custom paint colors you will need to contact an automotive painter.

Polyurethane paints designed for automotive bumpers will provide the best results.
